## About

2026 Bracket is a World Cup bracket predictor for fans who want to map out the 2026 tournament before it starts. It focuses on the qualifying playoffs, group-stage placements, third-place advances, and knockout picks, with a mobile-first interface that runs on the web. The app is tied to Vercel and Supabase, and it includes save-and-compete group features for private leaderboards.

## What is 2026 Bracket

2026 Bracket is a World Cup bracket predictor built around the 2026 tournament format. It helps you work through the playoff qualifiers first, then move into the full bracket

a free, mobile-first web experience, and its source material says it runs on Vercel and Supabase.

This bracket predictor is not just a static bracket image. It is designed around interactive predictions: you choose playoff teams, complete a bracket, and then save your picks so you can compare them with other people later. The tool also references a group-invite flow, which suggests it is meant for sharing brackets inside private groups rather than only for solo play.

## Key features

The bracket predictor centers on a few tournament-specific actions that are visible in the app itself:

- Select playoff qualifiers for the last six World Cup spots.
- Pick one advancing team from each of the March 2026 playoff paths.
- Rank 48 teams across 1st through 4th place in the group stage.
- Pick 8 third-place advancers.
- Predict knockout-stage matchups after the group phase.
- Save brackets and compete in private groups with a leaderboard.
- View saved brackets through a dedicated “My Brackets” area.

The app also surfaces a points note: brackets earn points once the group stage is 100% complete. That means the bracket predictor is built around tournament progress rather than instant scoring.

## How to use it

Using the bracket predictor is a step-by-step process that follows the 2026 World Cup structure.

- Start by selecting the six playoff teams you think will qualify.
- Move through the playoff paths and choose one winner from each path.
- Continue to the main bracket and rank the 48 teams in each group from 1st to 4th.
- Select the 8 third-place teams you believe will advance.

- Save your bracket if browser storage is available.
- If you were invited, complete the bracket to join the group automatically.
- Return to “My Brackets” later to review saved entries.

A practical detail matters here: the app warns that some browsers block the sign-in storage it needs, so a bracket may not save in an embedded or restricted browser. The on-site guidance says to open it in Safari or Chrome if that happens.

## Who it is for

This World Cup bracket predictor is best for people who want an interactive way to follow the 2026 tournament before kickoff. It fits fans who like to make structured picks, compare predictions with friends, or plan around likely matchups in advance.

It is also a reasonable fit for:

- fantasy-style World Cup players who want a clear bracket workflow
- group chats and private competition among friends
- fans who like to simulate the full tournament path from qualifiers to knockouts
- mobile users who prefer a browser-based bracket predictor instead of a desktop-only tool

The “perfect for trip planning” note suggests it may appeal to people trying to estimate when teams could advance, though the app is still fundamentally a prediction tool rather than a travel planner.

## What to know before you use it

The bracket predictor is useful, but there are some real limitations to understand before relying on it.

- It depends on browser storage for saving, so embedded browsers may not preserve your bracket.
- The app itself warns that Safari or Chrome may be needed for proper sign-in storage.
- Predictions are only scored after the group stage is fully complete, so there is no final bracket score until that point.

The content is based on the 2026 World Cup structure and playoff paths shown on the site, not an official FIFA results feed.

Matchups and points are prediction-based, so the app does not guarantee accuracy for actual tournament outcomes.

For official tournament schedules, confirmed qualifiers, and final results, use FIFA or another official source instead of the bracket predictor. 2026 Bracket is best for making and comparing predictions, not for verifying authoritative competition data.
